

魏恩廷 Tim Wei

My name is En-Tin. I hold a bachelor's degree awarded by National Taipei University of Technology in 2017. During my study, I participated in an internship offered by SYSTEX Corporation. I was responsible for analysing business model and the UI/UX of C2C electronic commerce platforms based in Taiwan. Aside from my course modules, I conducted my independent study on ASP.NET., structuring the web application which provides a platform that enables users to exchange secondhand goods. Since the third year of my study, I started to dig into the implementation of FrontEnd. Also, I am familiar with the use of JavaScript, React.js while doing my side projects. Solving tasks and problems by using web applications is where my passion lies in.
